

(An uncomfortable woman suffering from heartburn.)

ANNCR: Have you heard? The TIF procedure is a new option

(Animation of TIF procedure logo.)

for treating chronic heartburn and acid reflux. No pain. No pills. No scar.

(Stock video clip of a woman doing yoga.)

Because the TIF procedure is designed to repair

(Stock video clip of a man riding a mountain bike.)

your body's natural barrier without making an incision.

DOCTOR: Hi, I'm Dr. John Doe. If you're looking for freedom from the pain, costly medications, and dietary restrictions associated with GERD, call to schedule an appointment at New Horizons Surgery Center to find out if you're a candidate for the TIF procedure.

(End slate with logo, phone number and website.)

ANNCR: The TIF procedure may not be appropriate for your condition and results may vary. Talk to your doctor about benefits and risks. This message is co-funded by EndoGastric Solutions.
